Italian Healthcare Supply
& Procurement Partner

About

DS Medica is an Italian company specialized in the import, production and distribution of medical devices, PPE, electromedical equipment, disposable products and healthcare supplies.

The company works with public and private clients, helping them simplify purchasing, branding and supply processes while maintaining high quality standards and professional support.

Why IDS?

IDS supports healthcare buyers, distributors and institutions with a structured supply process, combining product sourcing, documentation support, import/export expertise and a wide portfolio of medical products.

Oxygen therapy

Disposable medical products

Gynecology

Urology

Electromedical equipment

Medical clothing

Emergency products

Diagnostic kits and tests

Healthcare furniture and
accessories

Orthopedic and
stomatherapy products

Quality & Compliance

In the medical sector, quality must be supported by proper documentation, traceability and regulatory attention.

IDS selects products registered and supplied with the required technical documentation, including CND and official registry references when applicable. This helps clients purchase with greater clarity, safety and control.

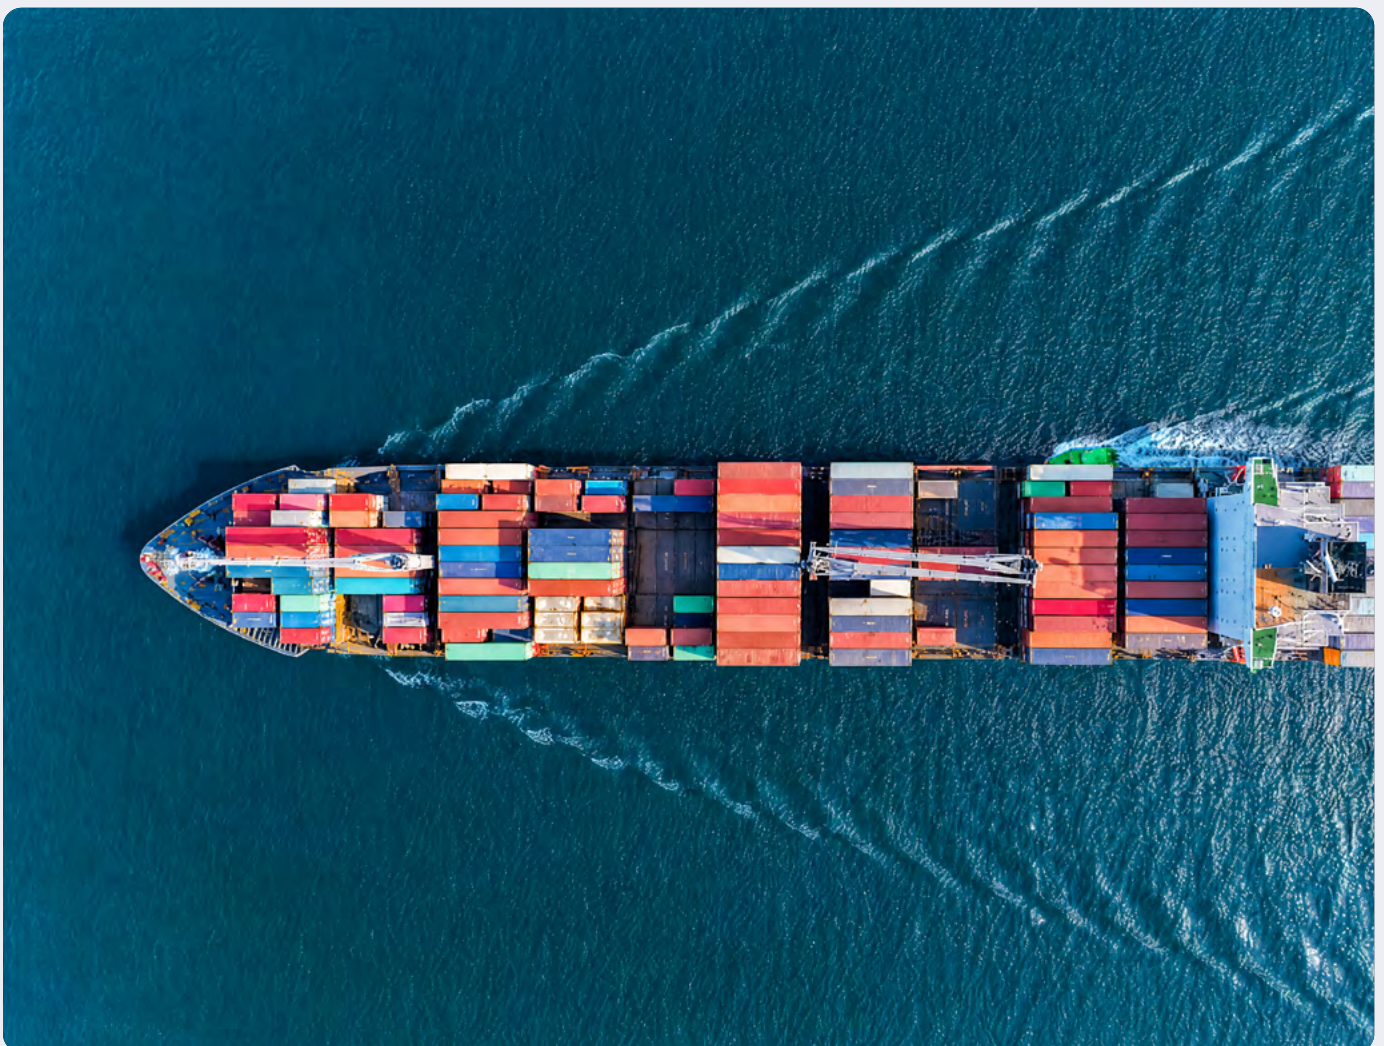

Import/Export

For international healthcare buyers, procurement is not only about finding the right product. It also requires documentation checks, certification verification, customs procedures and coordination between supplier, buyer and logistics partners.

IDS supports clients through the full import/export process, helping them manage product quotations, documentation, customs operations and supply planning.

This is especially valuable for international partners looking for a direct connection with the Italian medical supply market.

Tailor-made Projects

IDS develops tailor-made turnkey projects according to client needs.

The company can support partners in product sourcing, quotation, production, branding, trademark registration and supply organization. This approach allows clients to build dedicated solutions instead of purchasing standard products only.

Institutional Trust

IDS has worked with public and private organizations, demonstrating the ability to manage different types of projects in the healthcare and institutional sectors.
